

WarehouseGPT Benchmark Guide

Purpose of the Benchmark Guide

This guide explains how WarehouseGPT classifies KPI performance using WorldClass, Target, Warning and Critical thresholds.

Benchmark thresholds should be used together with trend, peer comparison and operational context.

Benchmark: SelectionRate_Cases

Business Meaning: Cases selected per productive hour

Direction: Higher is better

WorldClass: 195

Target: 180

Warning: 160

Critical: 140

- If KPI is better than world-class, capture best practice.
- If KPI is near target, continue normal monitoring.
- If KPI is in warning zone, investigate trend and related KPIs.
- If KPI is in critical zone, create action plan and assign owner.

Benchmark: PickRate

Business Meaning: Picked units per productive hour

Direction: Higher is better

WorldClass: 165

Target: 150

Warning: 130

Critical: 110

- If KPI is better than world-class, capture best practice.
- If KPI is near target, continue normal monitoring.
- If KPI is in warning zone, investigate trend and related KPIs.
- If KPI is in critical zone, create action plan and assign owner.

Benchmark: ReplenishmentRate

Business Meaning: Replenishment tasks completed per productive hour

Direction: Higher is better

WorldClass: 155

Target: 140

Warning: 120

Critical: 100

- If KPI is better than world-class, capture best practice.
- If KPI is near target, continue normal monitoring.
- If KPI is in warning zone, investigate trend and related KPIs.
- If KPI is in critical zone, create action plan and assign owner.

Benchmark: IdleSelectionTime_pct

Business Meaning: Share of waiting/non-productive selection time

Direction: Lower is better

WorldClass: 4

Target: 5

Warning: 8

Critical: 12

- If KPI is better than world-class, capture best practice.
- If KPI is near target, continue normal monitoring.
- If KPI is in warning zone, investigate trend and related KPIs.
- If KPI is in critical zone, create action plan and assign owner.

Benchmark: OnTaskTime_pct

Business Meaning: Share of labor time spent productively

Direction: Higher is better

WorldClass: 93

Target: 90

Warning: 85

Critical: 80

- If KPI is better than world-class, capture best practice.
- If KPI is near target, continue normal monitoring.

- If KPI is in warning zone, investigate trend and related KPIs.
- If KPI is in critical zone, create action plan and assign owner.

Benchmark: Overtime_pct

Business Meaning: Overtime as percentage of scheduled labor

Direction: Lower is better

WorldClass: 4

Target: 5

Warning: 10

Critical: 15

- If KPI is better than world-class, capture best practice.
- If KPI is near target, continue normal monitoring.
- If KPI is in warning zone, investigate trend and related KPIs.
- If KPI is in critical zone, create action plan and assign owner.

Benchmark: LaborHours

Business Meaning: Labor hours per employee day

Direction: Lower is better

WorldClass: 7.5

Target: 8

Warning: 9

Critical: 10

- If KPI is better than world-class, capture best practice.
- If KPI is near target, continue normal monitoring.
- If KPI is in warning zone, investigate trend and related KPIs.
- If KPI is in critical zone, create action plan and assign owner.

Benchmark: LaborCost_EUR

Business Meaning: Daily labor cost per employee

Direction: Lower is better

WorldClass: 180

Target: 210

Warning: 260

Critical: 320

- If KPI is better than world-class, capture best practice.
- If KPI is near target, continue normal monitoring.
- If KPI is in warning zone, investigate trend and related KPIs.
- If KPI is in critical zone, create action plan and assign owner.

Benchmark: OrdersProcessed

Business Meaning: Orders processed per employee day

Direction: Higher is better

WorldClass: 310

Target: 280

Warning: 230

Critical: 180

- If KPI is better than world-class, capture best practice.
- If KPI is near target, continue normal monitoring.
- If KPI is in warning zone, investigate trend and related KPIs.
- If KPI is in critical zone, create action plan and assign owner.

Benchmark: UnitsProcessed

Business Meaning: Units processed per employee day

Direction: Higher is better

WorldClass: 1250

Target: 1050

Warning: 850

Critical: 650

- If KPI is better than world-class, capture best practice.
- If KPI is near target, continue normal monitoring.
- If KPI is in warning zone, investigate trend and related KPIs.
- If KPI is in critical zone, create action plan and assign owner.

Benchmark: ForecastVolume

Business Meaning: Forecasted volume for planning

Direction: Higher is better

WorldClass: 1250

Target: 1050

Warning: 850

Critical: 650

- If KPI is better than world-class, capture best practice.
- If KPI is near target, continue normal monitoring.
- If KPI is in warning zone, investigate trend and related KPIs.
- If KPI is in critical zone, create action plan and assign owner.

Benchmark: ActualVolume

Business Meaning: Actual volume processed

Direction: Higher is better

WorldClass: 1250

Target: 1050

Warning: 850

Critical: 650

- If KPI is better than world-class, capture best practice.
- If KPI is near target, continue normal monitoring.
- If KPI is in warning zone, investigate trend and related KPIs.
- If KPI is in critical zone, create action plan and assign owner.

Benchmark: CapacityUtilization_pct

Business Meaning: Warehouse capacity utilization

Direction: Balanced is better

WorldClass: 88

Target: 82

Warning: 92

Critical: 98

- If KPI is better than world-class, capture best practice.
- If KPI is near target, continue normal monitoring.
- If KPI is in warning zone, investigate trend and related KPIs.

- If KPI is in critical zone, create action plan and assign owner.

Benchmark: EquipmentDowntime_Min

Business Meaning: Equipment downtime minutes

Direction: Lower is better

WorldClass: 10

Target: 20

Warning: 45

Critical: 75

- If KPI is better than world-class, capture best practice.
- If KPI is near target, continue normal monitoring.
- If KPI is in warning zone, investigate trend and related KPIs.
- If KPI is in critical zone, create action plan and assign owner.

Benchmark: InventoryAccuracy_pct

Business Meaning: Physical vs system stock accuracy

Direction: Higher is better

WorldClass: 99

Target: 98

Warning: 95

Critical: 92

- If KPI is better than world-class, capture best practice.
- If KPI is near target, continue normal monitoring.
- If KPI is in warning zone, investigate trend and related KPIs.
- If KPI is in critical zone, create action plan and assign owner.

Benchmark: PickingErrorRate_pct

Business Meaning: Picking errors as percentage of picks

Direction: Lower is better

WorldClass: 1.0

Target: 1.5

Warning: 3.0

Critical: 5.0

- If KPI is better than world-class, capture best practice.
- If KPI is near target, continue normal monitoring.
- If KPI is in warning zone, investigate trend and related KPIs.
- If KPI is in critical zone, create action plan and assign owner.

Benchmark: OnTimeShipment_pct

Business Meaning: Orders shipped on time

Direction: Higher is better

WorldClass: 99

Target: 98

Warning: 95

Critical: 90

- If KPI is better than world-class, capture best practice.
- If KPI is near target, continue normal monitoring.
- If KPI is in warning zone, investigate trend and related KPIs.
- If KPI is in critical zone, create action plan and assign owner.

Benchmark: Absenteeism_pct

Business Meaning: Workforce absence percentage

Direction: Lower is better

WorldClass: 2

Target: 3

Warning: 6

Critical: 8

- If KPI is better than world-class, capture best practice.
- If KPI is near target, continue normal monitoring.
- If KPI is in warning zone, investigate trend and related KPIs.
- If KPI is in critical zone, create action plan and assign owner.

Benchmark: SafetyIncidents

Business Meaning: Number of safety incidents

Direction: Lower is better

WorldClass: 0

Target: 0

Warning: 2

Critical: 4

- If KPI is better than world-class, capture best practice.
- If KPI is near target, continue normal monitoring.
- If KPI is in warning zone, investigate trend and related KPIs.
- If KPI is in critical zone, create action plan and assign owner.
